VP Eng & CTO of SaaS startups with 100k's of users in U.S. & LATAM. Software engineer specialized in full stack web development and leading technical teams. Passionate about building end-to-end & customer-driven software products, mentoring engineers and leveraging technology to tackle real-world challenges.

💼 Experience

VP Engineering

Apptegy
Abr 2021 - Present 📝

Help scaling and shipping a suite of products used by 2,000+ school districts in the US with quality and cadence goals in a high-growth Series-B EdTech startup. Leading a team of 80+ Software Engineers by building a high-performance yet thoughtful engineering culture. Enabler for growth & learning, facilitating continuous improvement and seek of excellence.

Platform SE Tech Lead

Mar 2020 - Abr 2021 📝
Remote 🌐
Little Rock, AK 🇺🇸

▼ ≡ Member of Platform & Infrastructure team working on new and existing products, building internal & user-facing components on top of a service oriented architecture.

- Advocate best design, architecture & coding practices, peer reviewing & unit testing across the Engineering organization
- Scrum master working with Product team following Agile methodologies
- Interview backend & full-stack candidates while onboarding 10's of new hires
- Hands-on development of Thrillshare platform and APIs mainly in Ruby on Rails, supporting Vue.js & Mobile (iOS & Android) clients
- Supporting Micro-services built with Ruby, Roda micro-framework & Sidekiq: Analytics, Data Management, Translations, Learning Management System
- Develop from scratch Ruby on Rails outpost services following a SOA pattern:
  - Auth: AuthN/Z identity provider based on OAuth2 & OpenID Connect standards to support SSO (Single Sign-on) and User Management across all Apptegy's products
  - Alerts: Multi-channel (SMS/Voice/TTS/Push), multi-provider (Twilio, Sendgrid, Facebook, Twitter) & multi-language relay service for school district notifications
- DevOps, CI/CD and release managment deploying in AWS: EC2, ELB, EKS, RDS, S3 clusters using Capistrano & Kubernetes

Tech Stack 🛠   Ruby on Rails   PostgreSQL   Vue.js   Roda   Sidekiq   Kubernetes   Capistrano   Jenkins   Jira

CTO

HealthTree
Salt Lake City, UT 🇺🇸
